- Business Administration
- IT Project Leadership
- Teaching
- Quantitative Analytics
- Agile Working

LANGUAGES

- English (Fluent)
- Danish (Fluent)
- Spanish (Intermediate)
- French (Basic)
- Mandarin (Basic)

PROFILE

Internationally raised former elite swimmer turned developer.

With a strong passion for ML, NLP, and the interplay between business and technology, I am motivated by solving complex challenges where innovation and results go hand in hand. I have a keen interest in IT and organizations, where technologies like LLMs play a growing role in optimizing processes and creating value.

I thrive in interdisciplinary teams and have experience translating complex technical issues into practical solutions—both through my professional work and as a teachers assistant in *Innovation and New Technology* at CBS.

I am now seeking new challenges in an organization where I can combine my technical expertise with a societal purpose and contribute to developing future-proof solutions with technology.

WORK EXPERIENCE

Thursday Consulting 2025 - Presently
Associate | Tech Management Consultant

- Optimized and automated internal workflows, including reporting processes, through scripting and data-driven automation.
- Designed and deployed multiple LLM & RAG-powered agents to assist consultants in organizing, summarizing, and automating research tasks.
- Currently developing a full-stack staffing platform to streamline consultant staffing requests and enhance project resource allocation.

Centrica Energy Trading 2023 - 2025
Data Analyst and ML Developer

- Developed and maintained several market tools for our traders on our inhouse analytics platform.
- Researched and developed advanced predictive financial ML models leveraging NLP to analyze diverse market data and forecast market impact.
- Maintained and updated a suite of robust data scrapers and cleaning tools to automate data collection and ensure high-quality processing across diverse sources.

REFERENCES

Bram de Jager

Centrica Energy | Head of Data Analytics

Allan Sloth Sorensen

WSAudiology | Director of Web Solutions

Jesper Winther

Brandbjerg Højskole | Lead Course Coordinator

Jan Damsgaard

Professor | Department of Digitalization at CBS

Copenhagen Business School

2022 - 2025

Bachelor Course Teachers Assistant

- Innovation and New Technology

- Developed and facilitated hands-on coursework in building MVP applications using React Native.
- Taught 300+ students core programming best practices—including Git version control and virtual environment management—to build a strong technical foundation in application development.
- Provided comprehensive guidance to students on refining their project concepts and translating ideas into effective technical solutions for their product and expected market.

Brandbjerg Højskole

2018 - Presently

Student, Volunteer and Instructor

- Served as both a student and instructor in Outdoor Life and Climbing, developing expertise in technical skills, safety protocols, and leadership in outdoor activities.
- Coordinated and facilitated volunteer work-weekends and events for groups ranging from 90 to 350 participants.

Fujitsu

2022 - 2023

Project Lead Student Assistant

- Assisted different IT project leaders to effectively manage projects and ensure on-time delivery.

WSAudiology

2021 - 2023

Digital Operations Student Assistant

- Provided global support, development, and maintenance for WSA's content management system.
- Migrated and developed WSA's online brand portfolio into a modern platform that remains in use today.

Copenhagen Business School

2019 - 2022

Exchange Student Crew Volunteer

- Facilitated and coordinated the CBS official exchange program, managing logistics and support for over 800 international exchange students per year.
